

Mixtvision is a Munich-based publishing company that focuses on publishing content in the areas of digital media, movie production, television and print. As part of a larger renovation project on the premises, the client requested a newly restructured office space of approximately 300 square meters. The primary intent of the new design was to create a casual, collaborative atmosphere that reflects a truly cosmopolitan spirit. The starting point for the concept was the designs of French ateliers from the 1920s combined with 1950s and 1960s design influences. The entire office has been built around the idea of providing as much transparency as possible to support collaboration within and across teams. Conference rooms and areas for flexible group work, bilateral conversations and phone calls have been created in addition to the regular working places.

MIXTVISION OFFICE

Mixing it up in style. Retro-chic meets stylish modernity.
